The diagram illustrates the electrical control system for the 'on-40ER-ES' device. It features a power supply section with a 220V input, a switch, a 1A fuse (F13), and a 220V output. The main circuit is divided into four sections, each containing a lamp (HL) and a corresponding output (Y). The outputs are connected to a terminal block with 18 terminals. The terminal block is divided into four sections: Y3-Y7, Y0-Y3, Y4-Y7, and Y3-Y7. The terminal block is labeled 'on-40ER-ES'.
